

PROFESSIONAL EXPERIENCE

Software Engineer

New York, NY

Bloomberg LP

Sept. 2023 – April 2026

- Led investigation of a production issue impacting user data during a migration impacting 27,000+ users, identifying root causes across services and driving a safe staged rollout.
- Improved SSL certificate renewal efficiency by enhancing documentation and leveraging AI-assisted troubleshooting, enabling engineers to complete renewals up to 50% faster.
- Leveraged Claude to design README templates and prompt workflows for revamps, piloting across high-impact repositories and driving adoption through engineer feedback.
- Built and maintained full-stack systems supporting internal productivity tools used by 27,000+ employees globally, enabling secure and scalable workflows, on a team of 16+ members.
- Collaborated across teams to support infrastructure migrations (Oracle to Postgres, IAM), contributing to system modernization efforts.
- Contributed to Exchange Online migration by implementing API changes and coordinated updates across multiple backend services for calendar and notification workflows.

Software Engineer Intern

Remote, GA

Intuit Mailchimp

May 2022 – May 2023

- Developed and improved frontend features for the Inbox UI using React and Node.js, enhancing performance and user experience.
- Collaborated with designers and engineers to build scalable, responsive web applications and resolve implementation challenges.
- Navigated a large production codebase to implement features, using feature flags for safe rollout and improving code quality through refactoring and code review feedback.
- Collaborated with 10+ team members in Agile ceremonies.

RELEVANT TECHNICAL PROJECTS

Best of Bloomberg (BOB) MCP Server

- Built an MCP server integrated with Copilot, collaborating with a new team to quickly ramp on an unfamiliar codebase and deliver a working prototype.
- Implemented backend functionality in Python to process user queries and retrieve event data, supporting 5 internal APIs, refining outputs through testing to improve response quality.

TECHNICAL/INTERPERSONAL SKILLS

Technical: C++, C#, Python, JavaScript, React, Node.js, CMake, Linux, Git, JIRA, REST APIs

Interpersonal: Bilingual (English/Spanish), Public Speaking, Leadership Development

EDUCATION

Bachelor of Science in Computer Science

Kennesaw, GA

Kennesaw State University

May 2023

- Google Latinx Leader, *Selected as 1 of 130 students from 870+ applicants*
- NASA Applied Leadership Scholar, *STEM Enrichment and Leadership Enhancement*
- Coding Club, *Founder*
- Society of Hispanic Professional Engineers (SHPE), *Member*

COMMUNITY INVOLVEMENT/LEADERSHIP

Leadership Coach Fellowship

Hispanic Organization Promoting Education (HoPe)

- Mentored 50+ high school students, providing tailored academic guidance.
- Presented monthly leadership trainings to 12+ participants monthly.
